EDUCATION

Cornell University, College of Engineering, Ithaca, NY **Dec. 2025**
B.S., Information Science, Systems, and Technology; *Concentrations in Interactive Technology and User Experience*

Relevant Courses: Human Computer Interaction, Interactive Web App Design, Visual Data Analytics for the Web, Intermediate Design and Programming for the Web, Introduction to Computer Game Design

PROJECTS

Sue Chef, Human Computer Interaction **Aug. 2023 - Dec. 2023**
UX / Product Designer Ithaca, NY

- Defined a product problem around decision fatigue in meal planning through user interviews with college students
- Synthesized research findings into personas, task flows, and design requirements
- Designed a high-fidelity, interactive Figma prototype featuring ingredient-based recipe discovery and dish modification
- Iteratively refined interaction design through usability testing, improving clarity, efficiency, and user control

Le Goosery Store, Advanced Topics in Computer Game Design **Jan. 2025 - May 2025**
Design Lead Ithaca, NY

- Designed a cohesive and scalable UI system across user flows (onboarding, navigation, feedback states), ensuring intuitive user experience across menus and gameplay
- Created and iterated on low to high-fi prototypes in Figma based on user feedback, significantly improving app usability during playtests
- Collaborated with 9 teammates to launch and present the mobile app to 475+ attendees at Cornell's 2025 GDIAC Showcase, earning the **"Most Polished"** award

Le Petit Raccoon, Introduction to Computer Game Design **Jan. 2024 - May 2024**
UI/UX Designer Ithaca, NY

- Designed and iterated on core user flows and interface components in Figma, prioritizing clarity, discoverability, and ease of navigation
- Conducted bi-weekly usability playtests and synthesized feedback to guide iterative design improvements throughout development
- Collaborated with a multidisciplinary team of 7 to ship and present a polished interactive product to 600+ attendees at Cornell's 2024 GDIAC Showcase, earning the **"Most Innovative"** award

EXPERIENCE

DesignAI Group, Cornell University, Summer Undergraduate Researcher **Aug. 2025 - Sept. 2025**

- Conducted user studies and post-session interviews to investigate how people interact with an AI-powered simulation
- Analyzed qualitative data and identified behavioral patterns in user interaction with the simulation
- Reported insights with the research team, which were later incorporated into the lab's research paper

Human-Computer Interaction Design, Cornell University, Teaching Assistant **Aug. 2024 - Dec. 2024**

- Evaluated student work across user research, prototyping, and usability testing
- Mentored students during weekly recitations on applying HCI principles to real-world design problems
- Led design critiques focused on usability, accessibility, and evidence-based design decisions

Server-Side Web Development, Cornell University, Teaching Assistant **Aug. 2025 - Dec. 2025**

- Provided detailed feedback on student projects, emphasizing maintainable code and system architecture
- Led weekly recitations translating backend concepts into practical applications and user-facing implications
- Supported students during weekly office hours by clarifying technical constraints and tradeoffs relevant to building usable and scalable products

SPECIALIZED SKILLS

Product Design Methods: User interviews, Usability testing, Wireframing, Storyboarding, Prototyping

Programming Languages: HTML, CSS, JavaScript

Tools: Figma
