

Le Gooséry Store

rocket
penguin

Big Picture

As a grocery store manager, your groceries have slowly been disappearing, despite the lack of business. Upon investigation, you discover that raccoons from the thriving restaurant next door have been stealing your groceries! Protect your groceries from raiding raccoons by strategically placing down barricades and setting goose patrols!

Platforms: iOS, Android

Genre: Tower Defense

Release Date: May 2025

Design Goals

★ Audience:

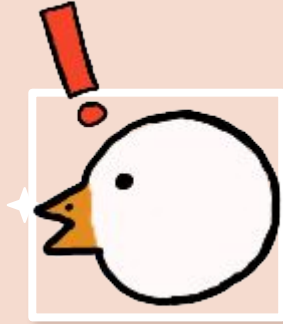

Le Gooséry Store aims to appeal to casual players (ages 10+) who love strategy and multitasking.

Gameplay:

Our game challenges players to **create** meaningful patrol patterns, in combination with their ability to **strategize** in real-time as waves of thieving raccoons invade their store.

Emotions

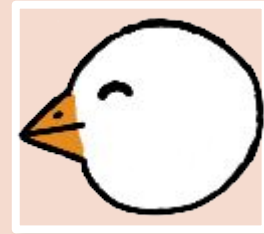

Panic

Waves of raccoons will prompt the player to react quickly and precisely.

Contemplative

Carefully constructing patrol patterns creates an effective defense.

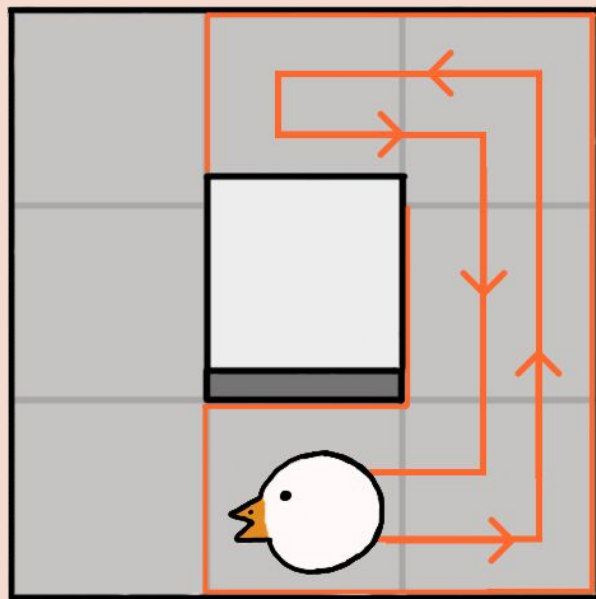

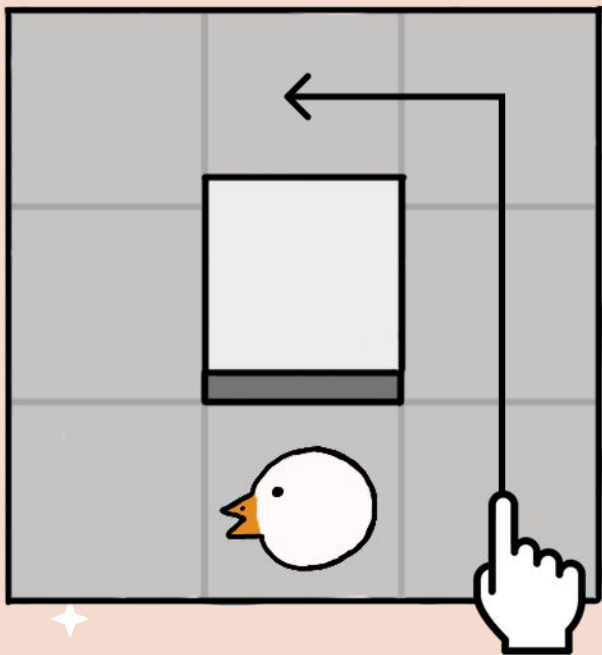

Satisfaction

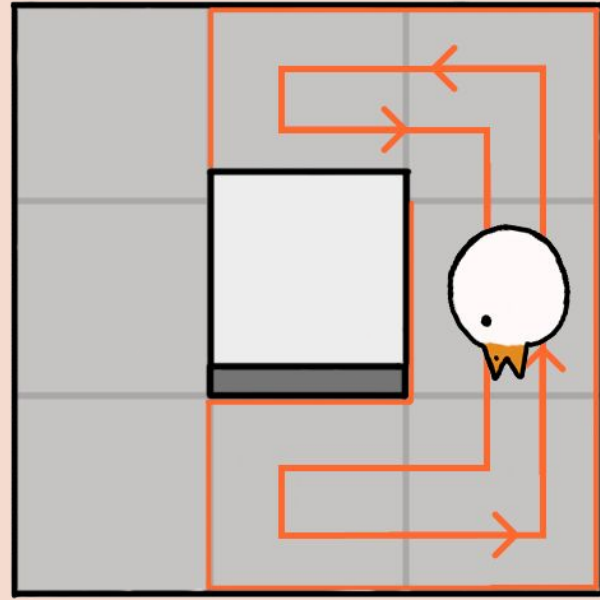

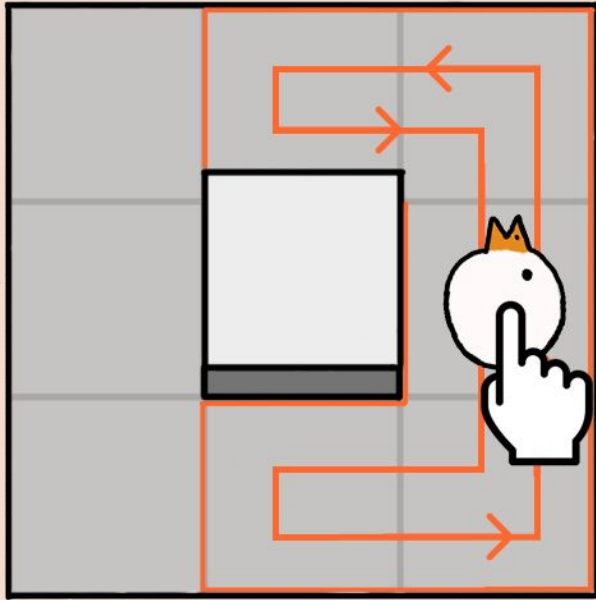

Successfully defending the groceries should feel rewarding.

Game Mechanics

Drag on tiles to create patrol patterns

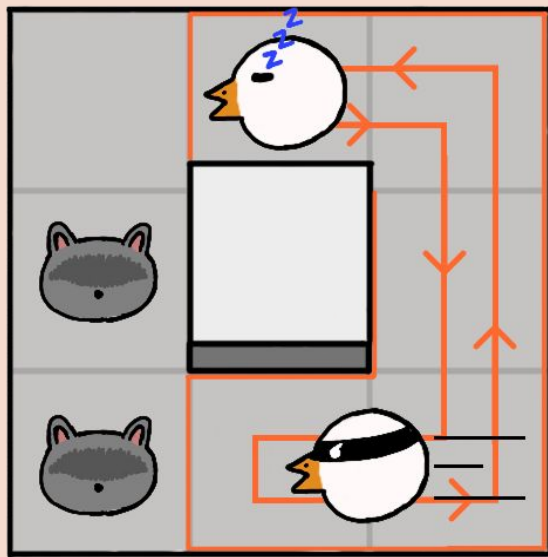

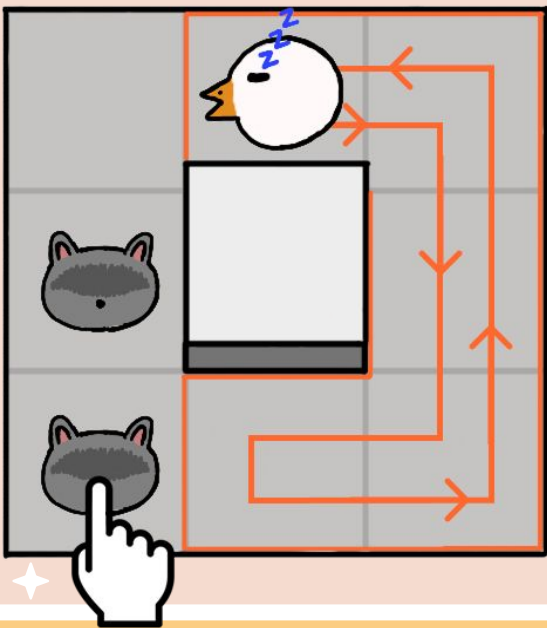

Game Mechanics

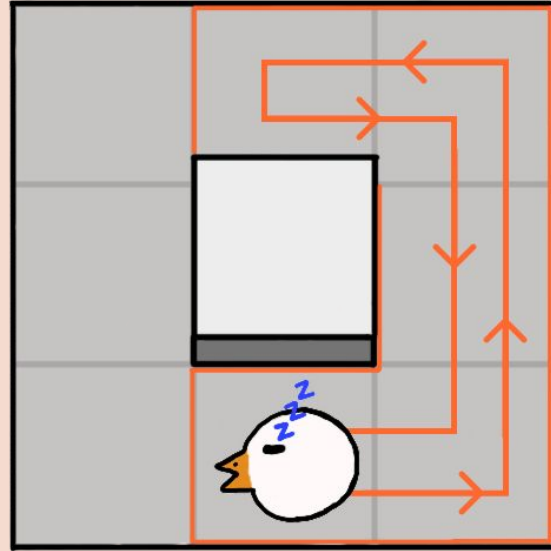

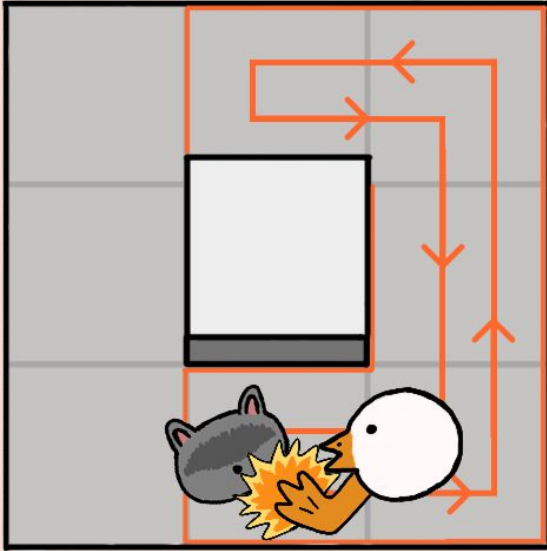

Tap on a raccoon to send an assassin goose after it, however the assassin goose has a long cooldown before it can be used again

Additional Mechanics

When a guard **collides** with an invading raccoon, the raccoon is kicked out and the guard becomes inactive for a short duration

Competition - Bloons Tower Defense ✨

Bloons Tower Defense is a classic tower defense game involving placing down multiple types of stationary towers to defend against multiple types of bloons.

✨ *Le Gooséry Store* offers far greater customization in the movement patterns of towers, which challenges the player to create thoughtful patrols for their guards.

Competition - Kingdom Rush

Kingdom Rush is a tower defense game where the player has limited control in attack - a majority of the gameplay is done through automatic attacks from their towers or troops.

★ *Le Gooséry Store* allows the player to partially control where the goose patrol attacks, adding more interactivity and uncertainty in the gameplay.

Competition - King of Thieves

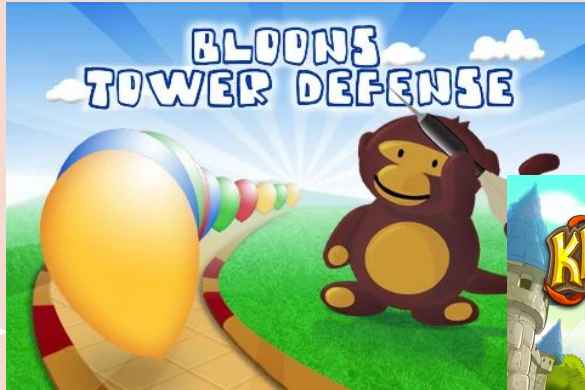

King of Thieves is an asynchronous base-building multiplayer game, where the base-builder and intruder are active at different times, and only one intruder invades the base at a time.

★ *Le Gooséry Store* is single-player with multiple raccoon invaders raiding your store at a time, making it difficult for the player to predict incoming enemies' paths and challenges them to react on the fly.

Competition - Price Point

As most of *Le Gooséry Store*'s competitors are free to play, our game will also be free to play. This will establish our game as a strong competitor in the tower defense mobile market.

Conclusion

Le Gooséry Store takes a new spin on the tower defense genre by challenging players to create thoughtful patrol patterns to fend off the raiding raccoons. Players can join in on the action by commanding their guards in real-time.

With fast-paced, chaotic, and exciting levels that keep the players on their toes, *Le Gooséry Store* offers an engaging experience for strategy-lovers aged 10 and up.
